Technology for your restaurant. Support from people who know you.

"We've been with bmc for over 30 years. If we have an issue, we can call and they respond quickly and get it resolved. In the restaurant business, there's always something to worry about . bmc makes our computer system one less thing we have to worry about."

- *Rich Constantino, Rose's Restaurant and Lounge*

Rose's RESTAURANT & LOUNGE

Elevate Your Restaurant POS System

Local Implementation and Support

From installation and staff training to ongoing service, our local team helps you get up and running quickly, and stays with you long after go-live.

Pay-at-the Table and Table-side Ordering

Improve the guest experience and turn tables faster. Servers can take orders and process payments directly at the table, reducing wait times and keeping service flowing naturally.

One Connected Restaurant Platform

One connected platform for your entire restaurant. Reduce disconnected vendors, access real-time reporting from anywhere, and keep payments, online ordering, and daily operations working together.

Online Ordering and Delivery Integration

Manage online orders from DoorDash, Uber Eats, and more through a single connected platform. Powered by KitchenHub, orders flow directly into your POS, eliminating multiple tablets, reducing errors, and keeping your kitchen running efficiently.
